

AISHA EVERING

Computational Life Sciences graduate student

shovon3000g@gmail.com • [602-750-8557](tel:602-750-8557) • [LinkedIn](#) • Phoenix, AZ • aishaportfolio.com • [GitHub](#)

PROFESSIONAL SUMMARY

Computational Life Sciences graduate student with an extensive background in software engineering, specializing in biological data processing, statistical analysis, and machine learning. Skilled in Python and R for cleaning, transforming, and analyzing complex datasets. Focused on applying statistical and machine learning methods to clinical and biological data, with an emphasis on bias, model performance, and real-world data challenges.

PROJECTS / PORTFOLIO

BIOLOGICAL DATA STANDARDIZATION AND EVIDENCE MAPPING

Developed Python-based data processing pipelines (Python, Pandas) to clean, normalize, and standardize heterogeneous research method data across studies, transforming unstructured text into consistent, analysis-ready formats and improving data quality for downstream analysis and evidence mapping.

POLYGENIC RISK SCORE ANALYSIS FOR TYPE 2 DIABETES

Conducted a structured literature review of polygenic risk score (PRS) studies for type 2 diabetes, synthesizing and comparing findings on model performance, bias, and cross-population transferability.

PLACENTA RESEARCH DATA CURATION (RESEARCH EXPERIENCE)

Curated placental research studies by extracting key variables and study metadata, structuring biological and experimental data for integration into a genomics database to support downstream statistical analysis and cross-study evidence synthesis.

MACHINE LEARNING PROJECTS (PORTFOLIO)

Developed and trained machine learning and deep learning models (Vision Transformers, DistilBERT) for classification tasks, focusing on data preprocessing, feature representation, and model evaluation.

EXPERIENCE

SOFTWARE ENGINEER, WORKIVA

Scottsdale, AZ

Jan 2019 - Jan 2023

Developed and enhanced features for a large-scale, customer-facing SaaS platform, translating GitHub and Jira requirements into scalable, production-ready solutions.

- Built and maintained data processing workflows within the application, transforming and integrating structured data to support system functionality and performance
- Analyzed and manipulated structured datasets to support feature development, improve system behavior, and enable data-driven application logic
- Developed full-stack application functionality using Dart (in-house framework), JavaScript, and supporting technologies across front-end and backend systems
- Collaborated with cross-functional teams in an Agile environment to deliver reliable, high-quality software updates in a data-intensive production system

SOFTWARE DEVELOPER, US AIRWAYS/AMERICAN AIRLINES

Phoenix, AZ

Jan 2010 - Jan 2019

Developed and maintained large-scale, customer-facing web applications supporting high-volume user traffic, building backend systems in C# and Java with a focus on performance and structured data handling.

- Designed and implemented application functionality across legacy and modernized systems (C#, ASP.NET, Java), contributing to both front-end and backend components in a complex production environment
- Supported system integration and large-scale migration efforts following the airline merger, improving data flow, system scalability, and long-term maintainability across platforms
- Worked with structured application data to support system functionality, performance optimization, and reliable user-facing behavior in a high-throughput environment
- Collaborated with geographically distributed, cross-functional teams to design, develop, and deploy production-ready software using enterprise development and version control tools

EDUCATION

ARIZONA STATE UNIVERSITY, MASTER OF SCIENCE, COMPUTATIONAL LIFE SCIENCES

Oct 2026

GPA: 4.0

UNIVERSITY OF ADVANCING TECHNOLOGY, BACHELORS OF SCIENCE,

May 2001

SOFTWARE ENGINEERING

UNIVERSITY OF ADVANCING TECHNOLOGY, ASSOCIATES OF SCIENCE,
APPLICATION DEVELOPMENT

May 2000

TEXAS STATE TECHNICAL COLLEGE, ASSOCIATES OF SCIENCE, LAST ELECTRO-OPTICS

May 1997

SKILLS

Python | R | Pandas | NumPy | Scikit-learn | TensorFlow | PyTorch | ggplot2 | SQL | Tableau | Plotly | Matplotlib | JavaScript | React | C# | Java | Dart | Git | Jupyter Notebook | Google Cloud
